

Managing clinical trials in Germany Our service portfolio

Experience x Expertise x 50 = Your Success

The Klinische Forschung Gruppe Nord (Clinical Research Group North) is a network of independent investigator institutes with five centres in Northern Germany.

Established in 1995 with the aim of responsibly providing studies for patients, doctors and the pharmaceutical research industry alike, a network with a catchment area of approximately ten million inhabitants has evolved from the Klinische Forschung Hamburg.

With more than 50 specialists at kfgn sites constantly supporting your success we aim to improve the national standard of clinical research and help to secure Germany as a top research location.

As an independent scientific institute, the Klinische Forschung Gruppe Nord is your reliable partner – together we can provide a lasting contribution to the development of effective and safe medicines for the world market.

H.G. Dammann

Prof. Dr. med. Hanns-Gerd Dammann

Founder and managing partner Klinische Forschung Gruppe Nord GmbH

Our competence

- Offering a unique concept of a centrally managed network comprising 5 professional clinical trial sites in northeast Germany to date
- Continuously expanding databases containing almost 20,000 recently registered patients and volunteers serve as best prerequisite for fast and reliable recruitment
- Low staff turnover, up to date medical skills, years of trial experience, continuing education and state of the art facilities are the base of our qualified work
- Regular contacts with the GPs in charge guarantee up to date informations on the patients medical conditions and treatments
- A fully developed SOP-driven quality management system enables high quality performance and continuous adaptations and improvements of each and every work process
- Almost 50 sponsor audits and inspections by regular authorities including the FDA passed successfully in the last 10 years
- **Callcenter managed and monitored by experienced trial physician**
- **Callcenter staff trained exclusively for clinical trials**
